Superfly

The O.C. Supertones

We came with jams equipped and I
I brought some rhymes to spit and I
Beats to move your feet and hips and I
Jesus, in these lyrics nowWe haven't stayed here, all these years to be no superstars
For those who thought we went away, well people here we are
LP number 5 and we have not begun to get it done
The Christ the focus, can you feel where I am comin' from?Can you hear this? Better turn it up
And when you feel me then it's loud enough
Come on everybody don't be shy
Just come inside you've got a right to rock the superflyWe came to rock the sure shot
We came to do the robot
Hate and stress alleviation
Spiritual inspirationWe want to elevate your mind to think on the most high
We came to lift your spirits up so people that is why
We educate and put this information onto tape and
And demonstrate the common grace of God, but hold up waitCan you hear this? Better turn it up
And when you feel me then it's loud enough
Come on everybody don't be shy
Just come inside, you've got a right to rock the superflyCan you hear this? Better turn it up
And when you feel me then it's loud enough
Come on everybody don't be shy
Just come inside, you've got a right to rock the superfly
Just come inside, you've got a right to rock the superfly
