

# Intro

NF

I'm lookin' like I'm gonna get it, you probably don't get it  
I come in your house with a microphone  
Lookin' like I'm about to set up a show in your kitchen  
I'm outta my mind but I feel like I'm in it  
If I never make it, don't make any difference  
I'm still gonna kill it  
You know what the deal is  
Ain't never no chillin' when I'm in the buildin'  
NF is a monster, I am a villain  
My music is sick, and you don't know what ill is  
You better get back, I don't write any filler  
I write what I feel and I'm feelin' a million  
So you better shh, be quiet, you hear it?  
I'm 'bout to lose it  
I'm on a whole different level of music  
Don't treat me like I don't have no clue how to do this  
You better rethink what you're thinkin' and move it  
Now picture me writin' when I was a kid tryna make it in music  
I'm thinkin' it's crazy  
I spent all my money on studio time, tryna get on my music so people could play it  
Imma keep it 100, my music was terrible  
Learned to get better, the more that I made it  
Go back to my Moments album  
Most of you people, you probably don't know what I'm sayin', hold up!  
What you're witnessin' now, don't try to figure me out  
I grab on that microphone, jump in the car  
They was laughin' at me, who they laughin' at now, huh?  
I laugh at myself, some people they lookin' like, "Wow"  
The moment you told me that you was a rapper, I couldn't believe it  
You believe it now?  
Step in the booth and I murder it  
You never heard of a rapper that kill it like I do  
I sleep on the couch in the studio, stay up 'til 3 in the morning  
And write 'till I get more  
The moment I wake up I feel like I don't even sleep  
And I'm ready to put out my record  
Well, thank you for buyin' it!  
Maybe you burned it!  
But either way, I'm gonna wreck it!

I look at the industry, look what it did to me  
You'll never make it if you never grind  
You put a whole lot of money into it, you better be ready to give it your time  
I look at the past few years of my life and I promise you I have been given it mine  
Try to keep up with this  
I'm not a puppet, no string on my back, I'm one of a kind  
Music is changing, no way to tame this  
I am an artist, look what I painted  
Hang up the caution tape, I'm dangerous  
Does anyone know where my brain is?  
Rappers are comfortable knowing they're famous  
But I really don't care what your name is  
And I really don't care if I'm nameless  
Y'all just drivin' around, I know where my lane is  
Cocky? Nah, I'm competitive?  
This is a job for me, it's adrenaline  
Don't try to box me in, I am Mayweather  
I come in the ring, my punches are way better  
I never drink but I live in these bars  
The moment you blink is the moment you lost  
Say you a king, who put you in charge?  
Don't care what you think, I'll break in your car  
Climb on the top of it, sound the alarm  
And wake up the neighborhood, rap in your yard  
And the carry the speakers on both of my arms  
'Til you keep sleepin' on me, I'm at large  
Enough with the jokes, I ain't jokin'  
You come in a session with me Imma show you what dope is  
And when I say dope I ain't talkin' 'bout smoke  
And I'm talkin' 'bout music that has an emotion  
I look at this mic, it's part of my family  
Take it away, I'm comin' to find you  
I've been through a lot in my life  
And it's hard to get people to listen when no one's behind you  
And then Capitol came in the picture and gave me a shot  
And look at it now  
I look at the team I'm dealin' with, these people ain't playin' around  
Lookin' back, I gotta laugh  
I was in a whole different place a year ago  
I look at the math, I look at the map  
And thank you God, I swear it's a miracle  
And I'm sorry, but I gotta leave  
But man, this track was beautiful  
The least I can do if I murder a beat is take the time to go his funeral
