Your One And Only Man

Eric Clapton

If I can only, make you see
That you were only, meant for me, now
Our love will be free
And I'll be your destiny
Destiny, destiny, right, now, now, now, babe
If I can only make you understand
Treat me right and love me
Then I will be your man
Your one and only man
These are the words, that I have to say
Live by them each and every day, now
And as the time pass
I know our love will last, our love will last
Our love will last now, now, now babe
Take me blue, understand them
Live by them and love me
Then I will be your man

Your one and only man
These are the words, that I have to say
Just live by them each and every day, now
And as the time pass
I know our love will last, our love will last
Our love will last now
Take me blue, understand them
Live by them and love me
Honey, I will be your man
I said your one and only man
Yes, your truly loving man, yes, your loving loving man
You don't need nobody to do nothing for you baby
I said I could just love and be just one guy that you need
I could say I could be just the one guy that you will love
I could be just everything that you want me to be, now, now
I said I could be just anything that you want in me
Darling, baby, my, my, my, my baby, na, na, wow
Just a little bit of soul
