

# Soul

## Van Morrison

Soul is a feeling, feeling deep within  
Soul is not the color of your skin  
Soul is the essence, essence from within  
It is where everything begins  
Soul is what you've been through  
What's true for you  
Where you going to  
What you're gonna do  
Soul is your station for the folk of your nation  
Something that you wear with pride  
Soul can be your vision or something that is hidden  
It's not something that you gotta hide  
Soul is what you've been through  
And what's true for you  
Where you going to  
What you're gonna do  
Soul can be your station for the folk of your nation  
Something that you wear with pride  
Soul can be your vision, it can be your religion  
Something that you just can't hide  
Oh, soul is a feeling, feeling deep within  
Soul is not the color of your skin  
Soul is the essence, essence from within  
Soul is where everything begins
