

Take It Slow

[K.Avett](#)

Eyes open wide, can't sleep tonight
clock says half past 3
and I'm missin you and all things you do
So baby come home to me
I know you're working late, but it don't stop this ache
that's got me feelin in the mood
But for now I can wait and anticipate
the sensuality you bring, aint no need for hurryingChorus
Take your time let me ease your mind
You don have to say a word
No need to rush this thing it's just you and me
We don't have no where to go baby take it slow and just
repeatI hear the ring of the phone
you say you're on your way home
Excited that you're on your way
And if i was getting sleepy now you got me to feelin
like puttin on some Marvin Gaye
I'm reminiscing bout the taste of your kiss
the way you bring the pleasure and pain
So when you walk through that door and i can't take it no more cant wait to do it all over againChorus
Take your time let me ease your mind
You don have to say a word
No need to rush this thing it's just you and me
We don't have no where to go baby take it slow and just
repeatAll day and all night long I've been thinking about
(the way you move and the way you touch)
Feels so good to me...got me wishing so much that you would hurry home to me. It's a test of my patience
believe
(when you get home, baby i know)
we will take it slowTake your time let me ease your mind
You don have to say a word
No need to rush this thing it's just you and me
We don't have no where to go baby take it slow and just
repeat
