

Big Machine

Pink Cream 69

Now's got the time, your dream machine,
Driving with the passion through the night.
In the stroll you feel the beat,
You're driving faster than the speed of light.(Pre-)
Got your hands upon the wheel
Now it's time to test your nerves of steel.It's not a nightmare, it's time for you to care,
I'll take your place in the big machine.
It's not your last scream, it's not all that it seems,
Catch your place in the big machine.
Your time was call.
Now you feel the air drive against the road
As I will push the pedal to the floor.
To the observatory along the way
It's only long to live another day.(Pre-)
I'm feeling that you've come alive,
Don't forget you're on a bad with lie.It's not a nightmare, it's time for you to care,
I'll take your place in the big machine.
It's not your last scream, it's not all that it seems,
I take your place in the big machine.
Your time was call.Feel the passion in you come alive,
It could get you on a paradise.
It's not a nightmare, it's time for you to care,
I'll take your place in the big machine.
It's not your last scream, it's not all that it seems,
Catch your place in the big machine.
Riding down the road with a heavy load
Catch your place in the big machine.
Hands up on the wheel, test your driver's skill,
Get your place in the big, the big machine.
