Help Me Help You

Holly Valance

Tell me how it feels?
What you're going though
It's like a little too real
A little too real
Take another breath
Take another day
Get a little sad
Let it fade away
Help me heal the way you feel
Everything you conceal
Let me see how it feels?
Like a waterfall you know you can have it all
Take my hand
Help me help you
Help me help you
Help me help you
Help me when you're being cool
Make another plan
Feel a different sun
Set another sea
Now we can start again
Take another look
Play a different game
Fly another flag
And throw the past away

Help me heal the way you feel
Everything you conceal
Let me see how it feels?
Like a waterfall you know you can have it all
Take my hand
Help me help you
Help me help you
Help me help you
Help me when you're being cool
Help me help you
Help me wouldn't that be cool?
You will be free someday
The pain will go away

Just leave it in the past
You're already on your way
You know you can have it all
Take my hand
Help me help you
Help me help you
Help me help you
Help me help you
Help me wouldn't that be cool?
Help me help you
Help me help you
Help me help you
...
