Music In My Soul

DNA

I remember Sundays at the Harbour Bar
Drinking cider wishing on a cheap guitar
Playing songs from the sixties and the seventies
Fleetwood Mac the Eagles and the Bee Gees
And we would dazzle and dance under the moonlight
Love up the bar and drink until the moonlight
You were all rebels you were all stars
You put the music in everybody's hearts
It was such a long time ago
But I never want t let that go
When I close my eyes
I still remember
I still remember those times.
Send a message all over the world
I really want you to know
That people are falling in love
To the music on the radio
And I wouldn't be all that I am
So understand

I want the world to know that you put music in my soul.
I remember Sundays in the freezing barn
Huddled round heater trying to keep everybody
Warm
We were just rebels we were just stars
Trying to put the music in everybody's hearts
It was such a long time ago
But I never want t let that go
When I close my eyes
I still remember
I still remember those times.
Send a message all over the world
I really want you to know
That people are falling in love
To the music on the radio
And I wouldn't be all that I am
So understand
I want the world to know that you put music in my soul
