Lately

The Robot Ate Me

lately when i speak out
they laugh and take me in
they send me off to places
they have never been
they were in the same place yesterday
talking about the people they're not
the things they want
we aren't like them
we aren't like themlately when i speak out
it's just to my friends
there isnt hope for us
if you we don't let others in
i was in the same place yesterday hoping for
people to be the changes they see
we aren't like them
we aren't like them
