

The Stars

Lady Antebellum

Life is a beautiful messed up mystery
Yeah, it's true, it can make you laugh, it can cut you deep
Sometimes you gonna feel like a million bucks
Sometimes a burned out cigarette
But whatever comes your way, no matter what, don't you ever forget
The stars ain't got nothing on you
Your heart burns much brighter than the moon
If you ever feel lost and broken inside
Just remember the way you helped me shine
The stars ain't got nothing on you
Your eyes got a fire that can burn the cold away
And your smile could turn the darkest night into a summer days
Sometimes you're gonna feel like you just can't lose, sometimes you reaching for the reset
But whatever comes your way, no matter what you're going through, don't you ever forget
The stars ain't got nothing on you
Your heart burns much brighter than the moon
If you ever feel lost and broken inside
Just remember the way you helped me shine
The stars ain't got nothing on you
You're a sunset hanging off a purple sky
You're the perfect melody to a lullaby
So life gets too much, take a deep breath
And don't you ever forget
The stars ain't got nothing on you
Your heart burns much brighter than the moon
If you ever feel lost and broken inside
Just remember the way you helped me shine
The stars ain't got nothing on you
Yeah, the stars ain't got nothing on you
