

Make It Matter

Natalie Grant

Pack my bags and my regrets
Every moment that I've wasted
Chasing after my pursuit of happiness
Has only left me searching, there must be more
Take my life and lift me up to the sky
Take my dreams and help me to fly
On the wings of possibility
Come rewrite my history'Til it's only You I'm chasing after
Take this life and make it matterHelp me give more than I take
And let me see into somebody else's heartache
And be the difference love can make
My heart is finding there's gotta be, gotta be more
Take my life and lift me up to the sky
Take my dreams and help me to fly
On the wings of possibility
Come rewrite my history'Til it's only You I'm chasing after
Take this life and make it matterOnly one life to live
Only one love to give
Only one life, only one love
So make it, make it matterOnly one life to live
Only one love to give
Only one life, only one love
Make it, make it matterOnly one life
Only one love
Give my life
Take it, make it matterPack my bags and my regretsTake my life and lift me up to the sky
Take my dreams and help me to fly
On the wings of possibility
Come rewrite my history'Til it's only You I'm chasing after
Take this life and make it matter
Make it, make it matterOnly one life
Only one love
I've got only one life
To make it matter
