

Too Late

Scribe

Scribe and Ali and yeah, we still together
Through the stormiest weather its been along forever
Holding it down in the south surrounded by the southern Alps
With the lyrics hot fun if you know what I'm talkin' 'bout
Then throw your hands in the air I freestyle in the square
Then I'll catch a number five so I can rock at the pier
Get live I'm 90.5 the main source show
Spell it out for cats who don't know bout the F L O
And we how move through the rain sleet hail and snow
Rockin' mic with our minds heart body and soul
I'll be unsigned hype till I get creative control
And I know the haters praying that the Scribe won't blow but
(It's too late)
And I made it like that I sacrificed everything just to get where I'm at
And to be honest I'm not stopping till I'm counting them grands
And every thing's on schedule and according to plan
But so your out of time if you think your fucking with mine because
(It's too late)
I know you didn't want to see Scribe and Ali doing our thing but
(It's too late)
Yo, smiling at my face stab me in the back it's cool because
(It's too late)
Because I'm here now its our year but for you
(It's too late)
Yeah it's too late Scribe and Ali since 98 still going
We're still flowing like a can of Speights
Still cut up the vinyl plates like a piece of cake
Still write songs to stimulate your mental state
Sharpen your state of mind catch up yo you way behind
Like even your anatomical clock is out of time we on a mission
Moving up at a steady pace aiming for first place
So we got no time to waste and you can do it too
The Scribe is gonna show you how the only trick is
That you got to d-d-do it now and stop sitting around
Like you got nothing to do say you can't do it
Then it's already too late for you take out a leaf out of rhyme book
You know I made it through can't teach a crowd
If you can even educate the crew you know I came prepared
Training for several years I made it here without a second to spare

But so your out of time if you think your fucking with mine because
(It's too late)
I know you didn't want to see Scribe and Ali doing our thing but
(It's too late)
Yo, smiling at my face stab me in the back it's cool because
(It's too late)
Because I'm here now its our year but for you
(It's too late)
Said it's too late for haters out there trying to stop me
Now you never heard, yo I submerged from the underground
This time I'm staying up and I ain't never comin' down
I made it this far and I did it all by myself so think twice
If you think gonna take me out said you don't know me
And you don't know what my crews about
'Cause we've been doing this we're not losing this
And we've been proving we're forever staying true to this
Get with the movement as I'm not hanging round for long
In fact I'm gone you're too late you better check my song you know this
Lyricist individualist MC Puri- Slash communication specialist
Even when effortless my skill can still rip a show
This Scribe is definitely so don't act like you didn't know
I know you know my rhyme and you flow it line for line
But it's too late to decipher 'cause you out of time
But so your out of time if you think your fucking with mine because
(It's too late)
I know you didn't want to see Scribe and Ali doing our thing but
(It's too late)
Yo, smiling at my face stab me in the back it's cool because
(It's too late)
Because I'm here now its our year but for you
(It's too late)
