

When It All Goes Down

Tank

Turn the lights on, yeah... When it goes down. When it, when it, when it goes down.

Once I get you goin, you ain't gonna wanna slow down. Cause you aint even knowin just how good it feels when it all goes down. And your cloths, they wont be a problem, no. They wont be a problem for long. No baby, cos those are coming off they'll be gone when im loving you.

I know your dressed up but let's go back in, don't take them heels off, ready for action. Cause when it all goes down. When it goes down, when it, when it, when it goes down. Girl you should rest up and now your strapped in, girl you the best love, its time for action. Causes when it all goes down. When it goes down, when it, when it, when it goes down.

Theres no need for talking, don't wanna hear you making no sound. It's time that I get lost in your love, no tapping out before the third round. And your cloths, they wont be a problem, no. They wont be a problem for long. No baby, those are coming off, they'll be gone when im loving you.

I know your dressed up but let's go back in, don't take them heels off, ready for action. Cause when it all goes down. When it goes down, when it, when it, when it goes down. Now you should rest up and now your strapped in, girl you the best love, its time for action. Cause when it all goes down. When it goes down, when it, when it, when it goes down.

I know your dressed up but let's go back in, don't take them heels off, ready for action. Cause when it all goes down. When it goes down, when it, when it, when it goes down. Girl you should rest up and now your strapped in, girl you the best love, its time for action. Cause when it all goes down. When it goes down, when it, when it, when it goes down.
