

# Witness

## The Wallflowers

I'm standing outside your window, baby  
And there you are  
Another year, another candle's burning  
For the party girl  
No one even knows that you're there  
Happy birthday, no one cares You come around here  
You'd better bring a witness  
Everyone in here's on the guest list  
And when you're gone you won't be missed  
Keep one eye open when you kiss Your wishes won't be coming true this year  
And darling don't you cry  
We're going to teach you everything  
You'll learn to get by  
Now, lesson number one in homicide  
Is emotional murder is no crime You come around here  
You'd better bring a witness  
Everyone in here's on the guest list  
And when you're gone you won't be missed  
Keep one eye open when you kiss Now, sticks and stones, baby, break your bones  
But the names in here can kill  
We'd let you leave but no one else wants you  
Your ransom was not made  
Now, you ain't got to stand up tall  
But now baby, you must stand up You come around here  
You'd better bring a witness  
Everyone in here's on the guest list  
Now, we've never been so impressed  
Keep one eye open when, whenever you kiss
