

# True Love In the Galaxy

## Mourning Widows

Sadness runs, lonely dies, fear explodes  
The moment you arrive  
And all the stars align, I'm fineLife's a trip, start to fall, just in time  
I float inside your eyes  
I sit there for a while and smileYou know there's somebody out there  
You know there's something out there  
Well what are you waiting for?Come aboard the rocket ship  
We're blasting through the Milky Way  
Where love is a billion meteors  
Crash-landing into youTrue love in the galaxy  
Have you heard the crazy news isn't true  
They say that love, it dies  
Can't believe the lies they lieThey don't know where we live  
The galaxy where love surpasses love  
I wish they'd all just come with us
