

# Bringer Of Silence

## Mactatus

walking against time  
reliving decay and despair inheriting the sensitivity of absolution a leap of faith bringing  
forth vulnerability battle cries from the above  
bringer of silence relict from the living scared from the dead in form of sheep, wandering with  
the wolves giving place for anxiety in a world of no fear escalator of pain  
bringer of silence opening the gates where life is undone inspired by miraculus life glow and  
the fluid leaking from the chosen singled out as absurd  
bringer of silence a dead of kindness in depriving man of death by an outcast cheated from  
years worth of hate enduring as a slave of innocence apparently the longing for benefaction  
disintegration the blackness of bleeding eyes eyes that have seen creation of destruction the  
bringer itself walkes amongst all bringer of silence  
endorser of the dying
