

# See Me Now

## Cartel

And it's the same foregone conclusion  
All the things hurt when I was young  
It's the sample of delusion  
Spit from everybody's tongue  
And I don't know how to be another  
Don't know how to be the one  
Oh, I have only just discovered who I am  
And where I'm coming from  
If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out  
And we can talk about solutions  
'Til we're red or blue in the face  
And we can stare at our illusions  
And just smile 'til the mirror breaks  
And I don't know how to be another  
Don't know how to be the one  
Oh, I have only just discovered who I am  
And what I have become  
If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out  
There's no accounting the days  
When you uncover what I see  
And are you going away?  
I swear it's only your mistake  
If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out  
If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now  
You would be the last one in or out  
If you could see me now  
There'd be no purpose left to try and figure out  
If you could see me now

You would be the last one in or out
