

I Know You Better Than That

[Leslie Mendelson](#)

I'm a little crazy on you
I can't help myself
Tell me what am I supposed to do? You're a little hard on me
I guess you don't want me to see
How honesty gets the best of you baby You say you don't mind one way or the other
Whether we're apart or we're together
You think that you're so cool with your whatever
You put on quite an act
But babe I know you better than that You look at me and then you look away
As if there's a price to pay
For giving me a little time Still you follow me around
As if I'm the only face in the crowd
I'm your every sight, I'm your every sound You say you don't mind one way or the other
Whether we're apart or we're together
You think that you're so cool with your whatever
You put on quite an act
But babe I know you better than that Come on baby give it up, give it up
Come on baby give it up, give it up You say you don't mind one way or the other
Whether we're apart or we're together
You think that you're so cool with your whatever
You put on quite an act
But babe I know you better than that
