Still Not Quite Enough

I See Stars

Right now I'm feeling right
Tonight's my night
And it's so good to see you all
Lighting up the rooms from a far
Up on the balcony a sight to see I'm coming I'm running I'm wondering
If you wanna spend the rest of your life with me.And I know we all just want the world to keep on spinning
It's still not quite enough
Stop us from dancing
It's still not quite enough
No the bass drop will never stop
This is where I wanna be
You will spend this night with me?We're over here
Now who's with me
Show this place one good time
Parade in the streets now
Show this place one good party!Put your hands in the air
And scream without a care
I'm not impressed
Let's do our best to live it up!And I know we all just want the world to keep on spinning
It's still not quite enough
Stop us from dancing
It's still not quite enough
No the bass drop will never stop
This is where I wanna be
You will spend this night with me?I travel the world
But it's still not quite enough
And for the first time in my life
I feel like you could be enoughIt's still not quite enough!(Instrumental)I travel the world and I know it's still not quite enough(It's not quite enough!)
For the first time in my life I feel you could be enough(It's not quite enough!)
It's still not quite enoughI travel the world
But it's still not quite enough
For the first time in my life
I feel like you could be enough
