

# Genetic Design for Dying

## Aiden

Advisory - the following lyrics contain explicit language:

Dear mother, I am lost and the damage has been done  
Im in love with my old century fix and this needle cant be wrong  
But I wonder where do we go from here?  
Because were never coming home  
The sequel to this nightmare lasts forever, forever  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight  
Im not scared at all, so lets walk away  
Im not scared at all, so now walk away  
Dear mother, now beyond the grave youre the soul that wants me  
Front row with a cigarette, youre the ghost that haunts me  
But I wonder, Im too fucked up to come home  
I swear this heart was made of stone  
I wont pretend that everythings alright when its not  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight  
Im not scared at all, so lets walk away  
Im not scared at all, so now walk away  
Wake me now, drive faster, make me now a disaster  
Take me now, live after and walk away  
Wake me now, drive faster, make me now a disaster  
Take me now, live after and walk away  
Can you design living through hell and back again?  
Its the life thats killing you, walk away, friend  
Can you design living through hell and back again?  
Its the life thats killing you, walk away, walk away  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight  
So one last goodnight with this painted picture in our minds  
The voice inside that sings tonight
