

# Till We Start To Kiss

[Kat Edmonson](#)

How I thought I knew you well  
Little difference I can tell is  
Something all along that I have missed  
Never stood so near before  
Never been quite here before and it  
Won't be long until we start to kiss  
Oh do you know how much I wish it to be so  
Or understand how much I'm wanting you to  
And gazing in your eyes  
I begin to fantasize  
About the things that we might do  
Heart is beating quickly  
Now it's really hit me that it  
Won't be long until we start to kiss  
Oh do you know how much I wish it to be so  
Or understand how much I'm wanting you to  
And gazing in your eyes  
I begin to fantasize  
About the things that we might do  
Didn't hear just what you said  
Feeling light in the head  
And not sure how it ever came to this  
Heart is beating quickly  
Now it's really hit me that it  
Won't be long until we start to kiss  
(We're getting closer now and it)  
Won't be long until we start to kiss  
(We're getting closer now and it)  
Won't be long until we start to kiss  
(We're getting closer now and it)
