

Won't Go Quietly

Example

I needed more than just a kiss goodnight
Had to go get something out my system
I ignored the warnings, bit the fruit, she might have tasted good
But man she was my Kryptonite
Shoulda known she was trouble from the start
I knew she'd broken hearts
I thought I'd take that chance
Danced with the she-devil in the pale moonlight
Alarm bells rang, but I loved the drama
In a dark place but I loved the Karma Sutra
Shoulda closed that door
But I kept going back for more
She's electric, she's the current running through my veins
She's a siren, hearing voices that I can't explain
Now I should be thinking it over, Instead I'm calling her over
Now she's here and she won't go quietly
I should be thinking it over, Instead I'm calling her over
Now she's here but she won't go quietly
I needed more than just a cheap thrill ride
See, I needed something that ran deep inside
Ignored the warnings, bit the fruit, she might have tasted good
But man she was my Kryptonite
Shoulda known it wouldn't last for a year
I knew it'd all end in tears
I cracked, she was mind-addictive
Never felt scripted, unpredictable
Tied up, but no strings attached
Left scratch marks on my back
Her cold eyes got me excited
And I can't hide the truth
She's electric, she's the current running through my veins
I just can't kick the habit, k-k-kick the habit
She's a siren, hearing voices that I can't explain
I just can't kick the habit
Now I should be thinking it over, instead I'm calling her over
Now she's here and she won't go quietly
I should be thinking it over, instead I'm calling her over
Now she's here and she won't go quietly
Can't see the end of this or who survives

It's just another case of do or die
Can't see the end of this or who survives
It's just another case, another case, another case
She's electric, she's the current running through my veins
I just can't kick the habit, k-k-kick the habit
She's a siren, hearing voices that I can't explain
I just can't kick the habit
Now I should be thinking it over, instead I'm calling her over
Now she's here and she won't go quietly
I should be thinking it over, instead I'm calling her over
Now she's here and she won't go quietly
Can't see the end of this or who survives
It's just another case of do or die
Can't see the end of this or who survives
It's just another case of do or die
Can't see the end of this or who survives
It's just another case of do or die
