Filth

The Plot In You

You better watch your fucking mouth,
Before I rip it off your face,
Right off your face,I saw you walk away,
Right through the door,
No goodbyes were said,
No goodbyes were said to me,
Leave the same way you came in,
We won't be waiting hereJust start your engine,
We've seen this act a million times,
Don't think we don't know what you do
When you're on your own,
Soak in the sex and greed,
Enjoy this while you canIt's coming backI saw you walk away,
Right through the door,
No goodbyes were said,
No goodbyes were said to me,
Leave the same way you came in,
We won't be waiting hereWe've seen this all a thousand times,
It's time for you to stay away,
We'll be just fine without you,
Don't show your face again,
We've been just fine without you,
Don't show your face againJust stay away
