Union, Jack

Big Audio Dynamite

Make a stand before you fall
Your country needs you to play football
"Wake up cunt", you hear the call
All for one and one for all
All for one and one for all

What happened to you men of might
When things were wrong, you made them right
All for one and one for all
All for one and one for all

Now in the classroom, well, I was told
'Bout the Empire, how you were bold
A pint of beer like passes by
Your spirits squased just like a fly
Your spirits squased just like a fly

Across this green and pleasant land
The powers slipping through your hand
All for one and one for all
All for one and one for all

"Wake up cunt", you hear the call
Your country needs you to play football
Make a stand before you fall
All for one and one for all
All for one and one for all

God bless the Queen, her people too
God bless this country and see us too
All for one and one for all
All for one and one for all

"England!"

"England!"

"This other Eden, demi-paradise
This precious stone set in the silver sea

This realm, this England"

"England!"

"They trained for it"

"God bless har sail and all who've bought it and I'm in labour"

"We are here today"
