Live It Down

Medicine

And you don't believe a word you told me
You never meant to be the first
The first hit is the worst
The second makes it hurt
The first hit is the worst
The second makes itAnd you seem to know my friends
They told me
We never forced ourselves on you
The third one breaks my back
The fourth one is aDon't you want to burn yourself forever?
Don't you want to live it down
'Till you are in the ground?
