

Happening

Hooray For Earth

Faced in front of a market line
Searchin' for something
Deeper into knowing all that's wrong
Over and over now
Reach for something Here is something happening, happening
This time
Here is something happening
We're laughing all night
Here is something happening, happening
Just that
We worry and nothing is happening Escalation is ...for us
Over and over now
Searchin' for something What ever have I proved wrong?
To my heart tonight
We search for something Here is something happening, happening
This time
Here is something happening
We're laughing all night
Here is something happening, happening
This time
We worry and nothing is happening Wasted in a parking lot
