

# Factories

## PUP

I built this life for you with my own two hands  
You've been sneaking around  
You've been with another man  
And I hope you know, buddy, what you've done to me  
When I come home from the factory,  
I'll make a plan  
Baby you know, I'm a jealous man  
And what goes around comes around  
You took the car, said you're leaving town We can play hide-and-go-seek  
But, baby, I'm playin' for keeps  
And down by the Don Valley Creek  
The water is dirty and deep  
Leave you under the overpass, with the broken glass  
By the factories Far as I'm concerned,  
You had it all,  
And you'll get what you deserve  
Cuz what goes around comes around  
And I'll slip away without a sound  
And they will track me through the night  
And in the dawn,  
Oh, they will hang me for what I've done Baby, it's alright  
I will be seeing you soon  
When the floor of the gallows  
Drops away, I will think of you Baby, it's alright  
I will be seeing you soon  
When the floor of the gallows  
Drops away, I will think of you When there's nothin' left to lose,  
Shave my hair and shine my shoes  
Hangin' from the noose  
Any last words,  
Better say 'em now  
I guess I was right,  
What goes around comes around
