Live Young, Die Fast

Alkaline Trio

It's no big surprise we turned out this way
It's in our eyes like shallow graves
But we are one with the larva and weeds
We don't discriminate at all for what it's worth
So live young, die fast, no one will last
So sit back and relax, enjoy the crash
You're fade into black and you're gone
Live young, die fast, die fast
Young easy life and untimely death
This doesn't work at all for me so save your breath
You took your time and stashed it away
Deep down inside of a cardboard box marked rainy day
So live young, die fast, no one will last
So sit back and relax, enjoy the crash
It fades into black then it's gone
Live young, die fast
And I feel a miracle in every breath that I breathe
Won't let this miracle end in tragedy
I sense a miracle in all that I see
Won't let this miracle slip away from me
Live young, die fast, no one will last
So sit back and relax, enjoy the crash
It fades into black then it's gone
Live young, die fast, die fast
Live young, die fast, no one will last, no
So sit back and relax, enjoy the crash
It fades into black then it's gone
Live young, die fast, die fast
