

What About Love

Lucky Uke

[i think this is in gm]Living on silence

Living by the book

You get it to a science

Of living on one good look

So put out all the fires

And blow away the smoke

I'm getting pretty tired

Of living on hope

So what about love, baby

What about making room for two

What about love, baby

What about you

Living on daydreams

Walking in my sleep

And nothing is as it seems

When you're in so deep

So put out all the fires

And blow away the smoke

Unless you're getting tired

Of living on hope

So what about love, baby

What about making room for two

What about love, baby

What about you

So what about love, baby

What about making room for two

What about love, baby

What about you

What about you

What about you

What about me
