

Show Me the Way (feat. Aloe Blacc)

Dilated Peoples

[Intro: Aloe Blacc]

The harder the work well the longer the day

Easy may come but it sure don't stay

Trying to cope, boy I hope and I pray

Show me the way

The harder the work well the longer the day

Easy may come but it sure don't stay

Trying to cope, boy, I hope and I pray

Somebody show me the way, somebody show me the way[Verse 1: Evidence]

I say hello to my people, hello to the day

I watch the world on wheels, hit the yellow and grey

The ones don't work are the ones don't eat

And once again, I'm from that city where that sun don't sleep

It's time to get live because the terms is breeched

Ride the wave like the world is a beach, learn more I teach

I was raised by N.W.A and stayed CA

All day, same story different briefcase

I'm nonchalant to others pedaling weight

I got a purpose to serving up and settle my state

Been through it, all of it, great

Put the ruler to the movement, all of it's straight

Big fish, even calling 'em bait

One love, one dish, see 'em all on my plate

I take the lady on a vacay, she call it a date

Now she calling in sick, now she calling in late[Hook: Aloe Blacc]

The harder the work well the longer the day

Easy may come but it sure don't stay

Trying to cope, boy, I hope and I pray

Somebody show me the way, somebody show me the way

I've been through some pitfalls that knocked me down

Made it through close calls and lost some ground

It's a hell of a price I pay

Somebody show me the way, somebody show me the way[Verse 2: Rakaa Iriscience]

The moon tagged the sun in, love to be alive

Feet hit the ground running, butterflies in my stomach

Like a matrix, trying to get it, trying to learn a lot from it

On a planet in regression, in a loft at the summit

Air is much clearer, catch me on the high road

Some fight to live, others settle for survival

It's your world, you can write the line you live your life on
It's heavy but you're strong, just hold on until that light dawns
It's started now, pardon me we're partying
Escalating, redefining the state of the art again
Celebrated, elevators open up to secret floors
Different rules and secret laws, from the roof you'll see the stars
Only fear boredom in a world of raw materials
Excite by potential, inspired by adventure
Calculated circles, the circumference and the radius
The only guest to float without a float through the parade is us[Hook][Verse 3][Evidence]
It's routine, by the beach I rise
First up, I hit the weed then I bleach my eyes
Then it's, to the drum machine to speak my mind
Tracks like fitted hats, pick a beat my size[Rakaa Iriscience]
Energized, on the darkest streets I shine
Saw the light up on the mountain, to the peak I climb
Breathtaking new perspectives on the life I grind
First tear of joy fell, looking like I'm crying
For just a moment[Evidence]
The feeling of being content
Not needing a dollar or a cent
Smile for my mama cause she proud
The studio, my headphones loud[Rakaa Iriscience]
Bridge builders will connect these crowds
Dedicated on my honor you can check these vows
That's purpose, power to make the powerful nervous
Hard work ain't easy but easy usually ain't worth it
They say[Hook]
