

# Kind Hearted Light (Live at Masters of Rock)

## Masterplan

We held up the metal torch  
And they tried to take the flame  
We've been running against the wall  
But we always overcame  
No sense no reason  
We are the ones you love to hate Feed the desire  
Fighting for our dreams  
Just look behind you  
The visions once believed  
Let's burn the bridges down  
And cast dispersion to the wind Who can we trust again  
We must look to find another way to  
That kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unity eternally Look for an exit  
In a dead end street of lies  
Judgment day comes to all  
Can you afford the price  
Turn your blackened faith  
And brain the venom from your mind Who can we trust again  
We must look to find another way to  
That kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key  
To unite eternally  
For eternity Kind hearted light  
Beyond the dark  
But clouds still hide the seven seas  
As the story unfolds  
No regret  
Unlock the key

To unite eternally
