

Bombshells

Miles Kane

This world keeps on rotating and
It's always changing who we are
I can see that the past is fading but
The future is waiting here to start

And then it hit me
And it blew my mind
Like a bombshell every time
Seize the moments and see the signs
This world is yours,
Yours and mine

If your world gets tilted sideways
And you've lost your highway home
Through the clouds the stars are shining
And the silver lining glows

On the right track,
On the right track, get on
On the right track,
On the right track, get on
On the right track,
On the right track, now
On the right track,
On the right track

I need excitement, I need a cure
When I feel so insecure
All the treasures in life's store
That's where we are heading for

And then it hit me
And it blew my mind
Like a bombshell every time
I take my moment
And you take yours
I love this feeling and I want more
