Right Road Now

Whitney Duncan

You say you want your freedom
You say I've got you trapped
And once you've lost that feelin', baby
You can't go back
Well, I've been doin' some thinkin'
And I think I feel the same
I'm gonna pour myself a tall, stiff drink
And watch you go your own way
While I go my own way
So bring it on, let the sun come out
Feel the storm burstin' through your clouds
Now that you're on the road there's a big heavy load
That I don't have to worry about
Yeah, I'm on the right road now
So don't you worry about me
I won't feel sorry for myself
Matter of fact by tonight
I'll be kissin' on someone else
Yeah, lovin' on somebody else
So bring it on, let the sun come out
Feel the storm burstin' through your clouds
Now that you're on the road there's a big heavy load
That I don't have to worry about
Yeah, I'm on the right road now
Tired of your lies stringin' me along
Started out right but it got so wrong
It's hard to make a turn, let it burn
Change the road I'm on
So bring it on, let the sun come out
Feel the storm burstin' through your clouds
Now that you're on the road there's a big heavy load
That I don't have to worry about
Yeah, I'm on the right road now, I'm on the right road now
I'm on the right road now
You say you want your freedom
You say I've got you trapped
And once you've lost that feelin', baby
You can't go back
