

# Say You'll Haunt Me

## Stone Sour

Little supernovas in my head  
Little soft pulses in my den  
Little souvenirs and secrets shared  
Little off guard and unprepared I was never good enough to find  
I was never bad enough to mind  
In the middle I will do my best  
Take me in your arms and leave the rest I will give you anything to  
Say you want to stay, you want me to  
Say you'll never die, you'll always haunt me  
I want to know I belong to you  
Say you'll haunt me Together, together, we'll be together, together forever Little variations on my page  
Little doors open on my cage  
Little time has come and gone so far  
Little by little who you are I can see the patterns on your face  
I can see the miracles I trace  
Symmetry in shadows I can't hide  
I just wanna be right by your side I will give you everything to  
Say you want to stay, you want me to  
Say you'll never die, you'll always haunt me  
I want to know I belong to you  
Say you'll haunt me Say you want to stay, you want me to  
Say you'll never die, you'll always haunt me  
I want to know I belong to you  
Say you'll haunt me Together, together, we'll be together, together forever  
I belong to you  
Together, together, we'll be together, together forever  
I belong to you Little supernovas in my head  
Little soft pulses in my den  
Little souvenirs and secrets shared  
Little off guard and unprepared I will give you anything to  
I will give you everything to Say you want to stay, you want me to  
Say you'll never die you'll always haunt me  
I want to know I belong to you  
Say you'll haunt me Say you want to stay, you want me to  
Say you'll never die, you'll always haunt me  
I want to know I belong to you  
Say you'll haunt me Together, together, we'll be together, together forever  
I belong to you  
Together, we'll be together, together forever  
I belong to you
