

Start With the End

Diego Garcia

Let's start with the end
Let's stay 'til the end
Enjoying our life
As lovers and friends.And all through this years
The time we will spend
Let's make it a point to remember
Tomorrow may never descend.Oh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.Oh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.Through all of this time
There's been heartbreak and pain
Those years left apart
Isolated in vain.Begining again
A new life on the ride
Let's make it a point to remember
To live with the joy in our lifeOh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.Oh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.Oh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.Oh let's start with the end
We've gone all the way round and now we're back again
Oh let's start with the end
Let's start with the end.
