Hold On To Love

Wigelius

Just as long as there's love, as long as there's love
In my life, I know that I've got enough to make things right
It's the power we need to overcome, what life brings
And as long as we got it we can conquer anything
There's no mountain, too high or a river too deep
Love's gonna carry me
Through the storm, through the rain
I know higher ground, I'll gain
If I keep holding on, holding on to love
Through the fire, through the night
Love will lead me to the light
Just as long as I hold on, hold on to love
No matter what's going on deep inside
In love there's a secret place, where I find
Just what I need to help me deal with what's gone wrong
When I was weak love lifted me and made me strong
There's no wrong I can't write, nothing I can't beat
Love will carry me
Through the storm, through the rain
I know higher ground, I'll gain
If I keep holding on, holding on to love
Through the fire, through the night
Love will lead me to the light
Just as long as I hold on, hold on to love
Love is the higher callin' that picked me up when fallin'
With love I know I can take it, gives me the courage to make it
Through the storm, through the rain
I know higher ground, I'll gain
If I keep holding on, holding on to love
Through the fire, through the night
Love will lead me to the light
Just as long as I hold on, hold on to love
Through the storm, through the rain
I know higher ground, I'll gain
If I keep holding on, holding on to love
Through the fire, through the night
Love will lead me to the light
Just as long as I hold on, hold on to love
Through the storm, through the rain

I know higher ground, I'll gain
If I keep holding on, holding on to love
