

# Glowing In The Dark

## Experimental Products

Glowing in the Dark2000 miles away from heaven  
And I'm feeling lost without you  
Look for a sign that's over the evergreens  
A silver side to turn toAnd I turn around  
On this frozen ground  
And I search the sky  
And I see the lightIt's like a single bullet and it guides me through it  
And the world starts opening up up up  
And with the speed I'm running though the night keeps coming  
I can trace your tracks in the dustGlowing in the dark I see your heart  
Glowing in the dark I see your heart  
Glowing in the dark I see your heart  
Glowing in the dark I see your heartI feel as strange and wild as the animals  
I feel the winter within me  
And beyond the sad song, the city  
The embers still kiss meAnd I turn around  
On this frozen ground  
And I search the sky  
And I see the lightIt's like a single bullet and it guides me through it  
And the world starts opening up up up  
And with the speed I'm running though the night keeps coming  
I can trace your tracks in the dustGlowing in the dark I see your heart  
Glowing in the dark I see your heart  
Glowing in the dark I see your heart  
Glowing in the dark I see your heart
