

# The Toy Master

## Avantasia

Don't you be afraid  
Come and step inside and take a look around  
I'm your holy grail in your candy store  
To save you from the profound  
They use to dream in only black and white  
Can't you hear them scream drowning in the tide  
Out in the cold I see water frozen in their eyes  
What a sorry sight  
I am willing to believe they would pay for a smile  
I'm the master of toys  
and all you girls and boys  
are welcome to my wonderland  
I'm the angel of joy  
and I'm here to paint the void  
Welcome to my world  
to my dream factory  
Say hello to the gentleman with the paint  
The deeper you're in the blue  
the sweeter the sound of your plaint  
If only I had a heart it would brake - Oh, sure  
And I wonder how much more they can take  
Out in the cold I see water frozen in their eyes  
What a sorry sight  
I am willing to believe they would pay for a smile  
I'm the master of toys  
and all you girls and boys  
are welcome to my wonderland  
I'm the angel of joy  
and I'm here to paint the void  
Welcome to my world  
I'm dealing in pain and little Novocaine  
Welcome to my world, to my toy factory  
No more struggle of the classes  
No more struggle of the masses  
On their knees - conformity  
They are ready for a hero  
They are flying at zero  
It's their turn  
to crash and burn  
No more struggle of the classes  
No more struggle of the masses  
On their knees - conformity  
They are ready for a hero  
They are flying at zero  
It's their turn  
to crash and burn  
Master of yer toys  
All you girls and boys  
are welcome to my wonderland

The angel of yer joy  
And I'm here to paint the void  
Welcome to my world  
I've come to bring your pain  
And a little Novocaine  
Welcome to my world
