

Angel Face

[Gary Glitter](#)

You're a child of sweet sixteen Never made the big town scene Always loved to stay at home Never made it on
your own I see your picture what do I see The face of an angel Staring at me staring at me Angel face angel face
You've got the cutest angel face Angel face angel face I'm gonna make you my angel face you don't know just
what I mean You should be a beauty queen Got to get you ready fast Who knows how long your looks will last
Look in the mirror believe that it's true The face of an angel Is looking at you looking at you Angel face angel
face . . .
