

# Fortune

[Slo](#)

Wounded eyes open  
Can't lose to save myself  
We took off in a race  
Never felt so awake as  
We drove all night long Take me away with you, oh let's drive Take me away with you by my side  
If we get lost, I'd feel better  
Will fortune favor the brave?  
So take me away with you, oh let's drive  
Words not needed that does spoken Let the fumes bridges burn and fair  
You took off in the night  
It was still, it was deadly quiet  
You drove all night long Take me away with you, oh let's drive  
Take me away with you by my side  
If we get lost, I'd feel better  
Will fortune favor the brave?  
So take me away with you, oh let's drive Take me away with you, oh let's drive (It's only you so take)  
Take me away with you by my side  
If we get lost, I'd feel better  
Will fortune favor the brave?  
So take me away with you, oh let's drive  
Take me away with you, oh let's drive  
Take me away with you by my side  
If we get lost, I'd feel better  
Will fortune favor the brave?  
So take me away with you, oh let's drive
