Back To Normal

Zebrahead

I'm feeling lost, I'm feeling like my heart's
Been carved out with a spoon
Put on display for all to witness
This decay of me and youAwaking and taking the cycle of
Breakin' up to a whole new level
Shakin' and fakin' like you're makin'
A hard choice not to settleEmbedded, I'm think headed
I shredded all the letters you sent
Don't get it, why'd you let it get this far
Now we'd fix that allLights out, lights out, pass the herb
That's when the lights out, lights out, kiss the curb
That's when the lights out, lights out, your heart has turned
Who's gonna save me every time I crash and I burnI'm sick of endings, I'm done pretendingI just want you back to normal
I think you don't know just how you feel
And every time you think of me
Remember how things used to be not long ago
Whoa-oh, whoa-ohIll fated, I skated to the party, faded
And I saw you there
I waited and hated, gettin' ignored
You stated you didn't careFlashes of car crashed
And your ashes burnin' the cement
Curtain fails, last call, credits roll
We have reached the endLights out, lights out, pass the herb
That's when the lights out, lights out, kiss the curb
That's when the lights out, lights out, your heart has turned
Who's gonna save you every time you crash and burnI'm sick of endings, I'm done pretendingI just want you back to normal
I think you don't know just how you feel
And every time you think of me
Remember how things used to be not long agoSick of endings, I'm done pretending
Tired of fighting, I'm sick of always tryingI'm feeling lost, I'm feeling like my heart's
Been carved out with a spoon
Put on display for all to witness
This decay of me and youI just want you back to normal
I think you don't know just how you feel
And every time you think of me
Remember how things used to be not long ago
Who-ahLights out, lights out, pass the herb

That's when the lights out, lights out, kiss the curb
That's when the lights out, lights out, your heart has turned
Who's gonna save me every time I crash and I burn
And I crash and I burn, and I crash and I burn
