E-lectric

S.P.O.C.K

People often talk about how technical we are
but I can assure you that we haven't got so far
So let's change it, let's rearrange it
put the plug in the wall, nuclear power to us all
Everything there is will be - Electric
Everything I see will be - Electric
Everything I touch will be - Electric
Everything, everything will be - Electric
Early in the morning a machine speaks to me
Starting to make breakfast when some friends of his I see
I want to hear some music so I press a button here
Electricity around me, without any fear, 'cause...
Everything there is will be - Electric
Everything I see will be - Electric
Everything I touch will be - Electric
Everything, everything will be - Electric
We are getting closer to the future every day
We have to start thinking in an electronic way
Because soon there'll be machines wherever you stand
So leave the past behind you, I hope you understand that...
Everything there is will be - Electric
Everything I see will be - Electric
Everything I touch will be - Electric
Everything, everything will be - Electric
