

We'll Rise

Krokus

Dark was the night
Tears on my face
We gathered in the candlelight
As the whole world stood still How can I forget that prayer for the dead
Underneath that blackened sky
As close as we could get It's the age we're livin' in
A dark sign of the times
Can't let the madness
Kick us down to the ground We'll rise, we'll rise
We'll shine in the night
We'll rise, we'll shine
From the ashes of eternity We'll rise, we'll rise
We'll shine in the night
We'll rise, we'll shine to eternity Another starry sky
Another silver moon
And soon the sun will shine
Warming our roofs Gather your children
We must move with the wind
To make a fire bright
From the flames within We'll rise, we'll rise
Like an eagle flies in the sky
'Cos together we're strong
And we'll rise, we'll rise
