

# You And Me

## Plain White T's

You and me, we like the same kind of music  
That's why we make a good you and me  
We got style, baby, we know how to use it  
That's why we make a good you and me  
You know what I'm going to say  
Before my mouth even makes a sound  
And that's why we make a good you and me  
You and me, we couldn't stand being normal  
That's why we make a good you and me  
We both laugh at the most random situations  
That's the key, baby, don't you agree?  
You know what I'm going to say  
Before my mouth even makes a sound  
And that's why we make a good you and me  
I know from the sound of your breathing

Exactly what you are feeling  
This is why we make a good you and me  
Make a good you and me, make a good you and me  
You and me  
You and me, all that we need is each other  
That's why we make a good you and me  
You know what I'm going to say  
Before my mouth even makes a sound  
And that's why we make a good you and me  
I know from the sound of your breathing  
Exactly what you are feeling  
This is why we make a good you and me  
Make a good you and me, make a good you and me  
You and me
