The Ghost

Deer Tick

Hold on until the ghost appears
That day is gonna last for years
Strange wind is gonna blow through town
Lightnin' is gonna strike us down
Blue hills are lookin' good to me
I go there when I'm fast asleep
Ghost town and the desert wind
Strange sounds at the worlds end
And then the winds start to blow
And the fire comes scorching down
And then the sky disappears
In the cloud with an awful sound
And when you can't hold out
Then you run to the underground
Just a blue star hanging out in space
Earth town is a lovely place
Strange winds coming from the sky
Lovers gotta say goodbye
And then the winds start to blow
And the fire comes scorching down, yeah
And then the sky disappears
In the cloud with an awful sound, yeah
And when you can't hold out
Then you run to the underground
Look out before the ghost appears
Look out before the ghost appears, yeah
Strange winds
No sky
