

Star of Bethlehem

Angels & Airwaves

What are you waiting for? She's here
She's a star, somewhere in the night time sky Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh The snow has come down on top of everything
The town is alive and well without you
The lights, they peer out of the leafless trees
And you won't be alone, I am beside you Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh True love, the stars in the sky illuminate below
The light is the sign that love will guide you home
The stars in the sky illuminate below
If the world were to die the light will guide you Tears spilling out across a dead-end street
Your house is a lonely box that holds you
A star, bright and loud, is in dire need
Of that fear, it is an empty fear inside you Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh
Yo eh, oh eh, oh eh, oh True love, the stars in the sky illuminate below
The light is the sign that love will guide you home
The stars in the sky illuminate below
If the world were to die the light will guide you The stars in the sky illuminate below
The light is the sign that love will guide you home
The stars in the sky illuminate below
If the world were to die the light will guide you True love, the stars in the sky illuminate below
The light is the sign that love will guide you home
The stars in the sky illuminate below
If the world were to die the light will guide you The stars in the sky illuminate below
The light is the sign that love will guide you home
The stars in the sky illuminate below
If the world were to die the light will guide you True love, the stars in the sky illuminate below
The light is the sign that love will guide you home
True love, the stars in the sky illuminate below
If the world were to die the light will guide you True love, the stars in the sky illuminate below
The light is the sign that love will guide you home
True love, the stars in the sky illuminate below
If the world were to die the light will guide you She's a star
