

Can You Feel It Too

Watercolor

I've seen the fireflies
Light up the summer skies
And I can feel it, can you feel it tooI've seen the river flow
For hours we watched it go
And I can feel it, can you feel it tooCHORUS: And you are like the Saturn rings
that wrap around my heart that sings
that everything that I now see
Your arms are like the ocean floor
that cradles me inside its shores
tell me do you feel it tooI've seen the autumn leaves
Crimson and tangerine
And I can feel it, can you feel it tooCHORUSThere are so many different things I've never seen
And like the air that I breathe I still believeWe watched the shooting stars
And felt how small we are
And I believe it, do you believe it too
And I believe it, do you believe it tooCHORUSI've seen the fireflies
Light up the summer skies
And I can feel it, can you feel it too
