# Rainbow

## Sugar Ray

I know that times are hard right now
But every struggle has its phase
I know that people bring you down
Save the trouble, just walk away
And the sun will burn the clouds away
And the sun will burn the clouds away
If you wanna see the rainbow
You gotta sit through a little rain
If you wanna see the rainbow
You gotta sit through a little rain
I know you feel like it's the end
With every ending something begins
I know life seems so pointless
But the point is for you to live
And the sun will burn the clouds away
And the sun will burn the clouds away
If you wanna see the rainbow
You gotta sit through a little rain
If you wanna see the rainbow
You gotta sit through a little rain
Everyone has to wait for the rain
For the rain, for the rain
It's okay, it's okay
The sun will burn the clouds away
The sun will burn the clouds away
If you wanna see the rainbow
You gotta sit through a little rain
If you wanna see the rainbow
You gotta sit through a little rain
Sit through a little rain, little rain
Sit through a little rain, little rain
A little rain
