

Empire

Clinton Washington

It's a danger zone to be left alone
This may end in flames but i have to know
Took me so long to hold the fire in my hands
Imma light the night and ignite the land Imma be your king. You will be my queen
We will take control and change the scene
Look there's our kingdom over the skyline off in the timeline Rise of something new in us
We will use our hands and trust
Im not gonna giving up giving up giving up until we've conquered an empire
You've got the heart I've got the strength to move a mountain
I have had the pain you've got the mind to win and then some
This is how we start an empire I'll take the load. You will be the guide
Let's prepare our love I won't leave your side
I'll face the demons. You'll face the Devil
Call for the Angels and the rebels
