

# What Does She Know?

## Kleenex Girl Wonder

There's been nothing but signs  
And that's been fine, but I've been thinking  
If you really want to leave me, leave me alone  
    Cos I need what I need  
    And you can't get this stone to bleed  
    But what do I know? I can't say I know  
        Oh, I'll never know

You've been reading my lines  
And every time, you look between them  
And now I wonder if I mean them, and you wonder too  
    Cos I see what I see  
    And it doesn't bother me  
But what does she know? What does she know?  
    And what do you do?

And listen to the right one singing all the wrong songs, baby  
    Oh, I'd rather finish last than finish third  
And listen to the tripe ones pushing all your buttons  
    Cutting in like kissing cousins [?]  
    Listening to every other word

Now we've run out of time  
But keep it in mind, I already know you  
So if you catch up to me, I'll show you the things that I mean  
    But we say what we say  
    Every night and every day  
But what to we know? What do we know?  
    And what have we seen?

And what does she know?  
What doe she know that I don't?
